Whomsoever it may concern

Dear Sir,

**Training of employees through iShiksha**

As an initiative for skilling and upskilling our new recruits as well as current employees, we have trained eligible employees of our organisation for a period of 6 months using iShiksha – a mobile platform of Skillpro for employee training and engagement.

We found the solution to be of enterprise grade, high quality and user friendly. A SaaS solution with various ready to use courses to select from, allowed us to get started in minutes once we decided to use the solution. In addition to the ready to use courses we could also upload our own training course content. Cloud based solution meant zero overhead, and required no maintenance overhead from our end. The inbuilt analytics helped monitor employees learning progress and performance.

iShiksha, with its healthcare content and courses related to common life skills like communication, basic conversational English, grooming, attitude helped us in enhancing the productivity of our employees and complemented classroom sessions.

We thank you for assisting us in our training efforts and look forward to a continuing business relationship.

Regards,

Kamal D Shah
